

ELECTRIC SUPPLY CONTRACT SUMMARY

You have purchased an electric supply product from CleanSky Energy. Your electric utility will continue to deliver the electricity you use to your home.

Price	20.49 cents per kWh. This does not include the price that your electric utility will charge you for the delivery component of your electric service.
Term	The above price will remain constant for 3 months. Your requested start date will be the date that you request(ed) during the enrollment .
Early Cancellation Fee	If you cancel your contract prior to the end of its term, you will be charged a fee of \$25.00 Cancellation Fee.
Automatic Renewal	<p>Your contract will automatically renew to a new price at the end of the contract term unless you inform CleanSky Energy otherwise. The new price may be higher or lower than the existing price.</p> <p>CleanSky Energy will contact you no later than 30 days before each automatic renewal to notify you of your supply options.</p>
Renewable Energy Content	The Commonwealth of Massachusetts requires that all electric supply products include a minimum of 58% renewable energy resources. This product meets the minimum requirement.
Incentives	Please see Terms of Service, if applicable.
Rescission Period	You have 3 days to cancel this contract free of charge from the time you receive your contract and terms and conditions.
Competitive Supplier Information	CleanSky Energy, DPU license number: CS-177, (888) 355-6205, www.cleanskyenergy.com . CleanSky Energy is only responsible for the electric generation portion of your bill.
Electric Utility Information	National Grid will continue to deliver the electricity that you use in your home and is responsible for the delivery charges that appear on your monthly bill. If you have questions about the delivery portion of your bill, contact National Grid at (800) 322-3223, or by visiting its website at https://www1.nationalgridus.com/Massachusetts .

The Massachusetts Department of Public Utilities recommends that consumers visit the Energy Switch website to view the broad range of available electric supply products, including your electric utility's basic service price. You can visit the website at <http://energyswitchma.gov>.

Effective Date: 6/1/2025
National Grid Service Area

Power Sources

CleanSky Energy projects that demand for electricity for all its customers in the period 1/1/2020–12/31/2020 will be met by generation from the following sources.

Power Source	Known Source	System Power	Total
Biomass	--	2%	2%
Coal	--	8%	8%
Hydro	--	8%	8%
Imported Power	--	0%	0%
Municipal Trash	--	5%	5%
Natural Gas	--	37%	37%
Nuclear	--	28%	28%
Oil	--	6%	6%
Other Renewable	--	1%	1%
Solar	--	3%	3%
Wind	--	3%	0%
Total	--	100%	100%

Air Emissions

Carbon Dioxide (CO₂), nitrogen oxides (NO_x), sulfur dioxide (SO₂) emission rates from these sources, relative to the regional average is compared to emissions from a new unit as determined by the Mass Department of Environmental Protection.

Labor Information

76% of the electricity from System Power came from power sources with union contracts with their employees.

INFORMATION DISCLOSURE LABEL - DEFINITIONS - For More Information: Massachusetts Division of Energy Resources website: <http://www.mass.gov/doer/> | Department of Public Utilities website: <http://www.magnet.state.ma.us/dpu/>

Generation Price

Generation Prices displayed are representative average prices for electricity at usage levels that are typical for residential and small commercial customers. Contract items displayed present the length of your contract for generation service and the price terms included in your contract. See your recent bills to determine average monthly use and your Terms of Service for additional information.

Power Sources

CleanSky Energy procures its electricity supply, on behalf of its customers, from system power contracts, not from specific generating units. The electricity customers consume comes from the New England power grid, which receives power from a variety of power plants and transmits the power throughout the region as needed to meet the requirements of all customers in New England. System Power represents power purchased in the regional electricity market. The System Power distribution presented in the table is based on the most recently available information provided via the NEPOOL Generation Information System. When you choose a power supplier, that supplier is responsible for generating and/or purchasing power that is added to the power grid in an amount equivalent to your electricity use. Known Resources include resources that are owned by, or under contract to, the supplier. System Power represents power purchased in the regional electricity market. Biomass refers to power plants that are fueled by wood or other plant matter.

Emissions

- Emissions for each of the following pollutants are presented as a percent of the regional average emission rate. Arrows represent, for each pollutant, the emission rate from a hypothetical new generation facility.
- **Carbon Dioxide (CO₂)** is released when fossil fuels (e.g., coal, oil and natural gas) are burned. Carbon dioxide, a greenhouse gas, is a major contributor to global warming.
 - **Nitrogen Oxides (NO_x)** form when fossil fuels and biomass are burned at high temperatures. They contribute to acid rain and ground-level ozone (or smog), and may cause respiratory illness in children with frequent high-level exposure. NO_x also contribute to oxygen deprivation of lakes and coastal waters, which is destructive to fish and other animal life.
 - **Sulfur Dioxide (SO₂)** is formed when fuels containing sulfur are burned, primarily coal and oil. Major health effects associated with SO₂ include asthma, respiratory illness and aggravation of existing cardiovascular disease. SO₂ combines with water and oxygen in the atmosphere to form acid rain, which raises the acid level of lakes and streams, and accelerates the decay of buildings and monuments.

Labor Information

The information on this label regarding whether generators or suppliers operate under collective bargaining agreements is provided to inform you about whether the energy was produced in plants where employee wages and working conditions are mutually determined by employees and management, and protected by union contracts. The information in this label regarding the use of replacement employees during a labor dispute is provided to inform you of whether a generator or supplier, during a strike by or lock-out of its employees, has replaced them with other workers.
